Finally, after receiving those most powerful words of encouragement, King Jehoshaphat and the people of Judah began to worship and praise God. As a result, V.22 says the Lord ambushed their enemies. We are told, in V.23, that they began to fight among themselves, killing each other in the process. (But God!)

Stimulus Package

By definition, a stimulus package is a package of economic measures put together by a government in order to stimulate a floundering economy.

Based on principles outlined by Keynesian economics, the goal of a stimulus package is to increase demand through increased employment, consumer spending, and investment.

In other words, the basic objective of a stimulus package is to reinvigorate the economy and prevent or reverse a recession by boosting employment and spending.
